

Green Events require the following measures

- **Climate-friendly mobility:** climate-friendly travel is encouraged to and from the event during planning and implementation
- **Seasonal, regional, and preferably organic food is to be preferred:** Non-regional food is purchased from fair trade companies; a vegetarian main course is offered
- **Reusable dishes and cutlery:** 100 percent reusable tableware and cutlery will be distributed at the event
- **Beverages in bulk or reusable containers:** Purchase in reusable containers, if available at the market
- **Bulk containers instead of single-serve packaging:** e.g., when serving ketchup, sugar, and milk
- **Waste separation and collection:** in guest and catering areas, in clearly labeled waste containers
- **No single-use decorations or disposable giveaways:** The decorations are to be re-used or, like the giveaways, are made from environmentally friendly or natural materials or come from a socio-economic company
- **Economical use of resources and renewable energy:** energy- and water-saving technology, environmentally friendly cleaning products, sparing use of or no printed matter
- **Accessibility:** a wide variety of needs should be considered
- **In advertising and external communication** the Green Event logo is to be used

Program details can be found at www.greenevent.salzburg.at.
