

Five good reasons to get the COVID-19 vaccine

- **Good for protecting yourself:** the vaccine is the best way to avoid developing a severe case of COVID-19 or long COVID
- **Good for family and friends:** it lowers the risk of passing on the virus
- **Good for the healthcare system:** Keeps hospitals from being overwhelmed and having to postpone operations.
- **Good for work, education and events:** Ensures your school, work and social life is as safe and “normal” as possible.
- **Good for fighting the pandemic:** it reduces the chance of virus mutations and is the most effective way to end the pandemic
