

## Registration for COVID-19 vaccination in the Province of Salzburg

Effective 15 February, all people in Salzburg over the age of 16 can register online or by telephone for a Covid-19 vaccination.

The time of registration does not have any influence on the date of the vaccination, which is subject to the Austrian vaccination schedule that also applies to the Province of Salzburg. The person registered will be informed as soon as the vaccine is available. This may take some time, because the number of available vaccine doses is very limited.

*“We ask you to be patient, as the groups with the highest risks still have absolute priority. Vaccination provides the best possible protection against a severe course of the coronavirus disease. This means our duty as medical professionals is priority ranking of people according to their vulnerability – in other words, to reduce the burden on the healthcare system and to save lives”,* the vaccination coordinator of Salzburg, Dr. Robert Sollak, explains.

### Registration for at-risk groups

Effective 15 February, registration is also open for people with underlying health conditions who belong to an at-risk group. You can either call the healthcare hotline number 1450 or register online at [www.salzburg-impft.at](http://www.salzburg-impft.at). When registering, you will be asked to name your illness or condition or tick the relevant box on the registration form. A corresponding certificate must then be presented to the vaccinating doctor. No certificate needs to be presented if the attending doctor is also the vaccinating doctor.

### Data and facts on booking your vaccination

- From 15 February for all people in Salzburg over the age of 16
- By phone at healthcare number 1450
- Online at [www.salzburg-impft.at](http://www.salzburg-impft.at)
